ARTIGLIO *Master* **CODE**

Half a century since the invention of the Artiglio and eleven years since the introduction of "Leva la leva" (leverless) technology, CORGHI sets the benchmark higher once again with the **ARTIGLIO MASTER CODE**.

With automatic wheel dimension acquisition enabling automatic tool positioning, and the invaluable Smart Corghi System demounting procedure, the MASTER CODE **rewrites the rule book for tire changers**, demonstrating once again Corghi's unrivalled ability to continuously steer the evolution of the sector.

The goals set for these new machines were to achieve an even higher degree of automatism, to increase performance and efficiency with all wheel types and to reduce the use of that increasingly precious commodity - time. The computerised **Touch Screen** system guides the operator through all procedures and suggests the best possible solution to any problem encountered.

MASTER CODE is compatible with all tire types, from Run Flat-UHP tires to both small and large balloon tires.

This latest creation from CORGHI - **THE ONLY INNOVATOR IN THE TIRE CHANGER SEGMENT** - makes work safer, simpler and quicker for the tire service professional while ensuring total protection for the rim and tire.

1 WHEEL DATA SELF-ACQUISITION

- self acquisition of wheel dimensions
- automatic tool positioning
- intelligent and very user friendly
- three wheel type settings
- quick
- safe
- ergonomic
- AUTOMATIC or MANUAL work cycle selection

interactive touch screen

wheel data self-acquisition

automatic tool positioning

2 SMART CORGHI SYSTEM

- Smart Corghi System demounting procedure
- minimised tire stress
- absolutely NO contact with rim!!!
- automated, synchronised tire demounting and mounting

3 DUAL BEAD BREAKER WITH CONTROLLED PENETRATION

- dual pneumatic bead breaker penetrator
- maximum rigidity
- maximum efficiency and precision
- dual opposed bead breaker discs with separately controlled cylinders

4 AUTOMATIC DIRECT LUBRICATION

- automatic direct lubrication of lower and upper bead
- direct lubrication during dynamic bead breaking ensures maximum efficiency even with most stubborn tires

5 MOBILE CONTROL CONSOLE

total control in all manual operations

- freely adjustable mobile control console
- simple, quick and intuitive controls
- extreme user friendly manual cycle

6 INTERACTIVE TOUCH SCREEN

- interactive multifunctional TFT-LCD TOUCH SCREEN interface with microprocessor control
- USB port for software databases update, and for loading files and videos
- playback capability for demonstration videos
- scheduled maintenance reminder, self-diagnosis, sensor state check and fault indication
- online help with instruction manual and special procedures (WDK, BSR, RFT, UHP)

high degree of machine-operator interactivity

online help content display

playback of video clips of certain procedures

7 NEW INTELLIGENT ELECTROMECHANICAL TURNTABLE

- intelligent electromechanical turntable
- new patented wheel clamp system
- fast
- simple
- reliable for all wheel types (comes equipped with additional specific flanges)

8 INTEGRATED LIFTER

- integrated fully articulated lifter with 85 Kg max. load capacity

9 BEAD DEPRESSOR

- bead depressor with adjustable working height
- depressor shape ideal for RFT tires
- WDK homologated

10 LATEST GENERATION INVERTER MOTOR

- second speed also available in reverse rotation mode
- torque control
- controlled acceleration curve to safeguard tire

11 "INFLATRON" ELECTRONIC INFLATOR

- integrated, automated inflation and deflation system
- permits automatic inflation of tire while operator performs other operations for optimised time use
- overpressure inflation for bead insertion
- touch screen user interface
- Bar, PSI and kPa scales
- end of cycle indicator

pressure setting

pressure reached

12 VIDEO CAMERA WITH IMAGE RECALLABLE FROM SCREEN

video camera activatable during operations, positioned for a clear view of the lower side of the tire

13 TREAD DEPTH PROBE

tread depth measurement

tread depth values: shown with yellow background to indicate values near minimum limit

tread depth values: shown with red background to indicate values below minimum limit

14 TIRE TEMPERATURE SENSOR (IN ACCORDANCE WITH WDK REQUISITES)

temperature measurement

20-25°C, green = work on tire may proceed normally

15-19 and 21-30°C, yellow = proceed with caution

<15 and >30°C, red = do not work on tire

- real-time tire and bead temperature sensor
- maximum measurement speed and precision (resolution 0.1°C), with value displayable in Centigrade or Fahrenheit
- intuitive colour-based temperature indication in accordance with WDK requisites for working with RFT and UHP tires

TECHNICAL DATA

Wheel dimension range	rim diameter	from 13" to 32"
	maximum tire diameter	47,2" (1200 mm)
Technical features	clamping	automatic
	drive system	2-speed inverter motor
	torque	885 ft/lb (1200 Nm)
	rotational speed	7-20 rpm
Bead breaking	maximum bead breaking range	19"
	upper bead breaker force	1641,1 lb _f (7300 N)
	lower bead breaker force	1641,1 lb _f (7300 N)
Touchless demounting/mounting tool set		
Wheel lifter load capacity		187,4 lb (85 Kg)
Power supply	electric 1Ph	230V-0.98 kW 50Hz/60 Hz
	electric 1Ph (alternative)	115V-0.98 kW 50Hz/60Hz
	pneumatic operating pressure	116 to 145 psi (8 to 10 bar)
Weight		1311,8 lb (595 Kg)

The manufacturer reserves the right to modify the features of its products at any time.
